Software Engineer || Back-End Developer

EDUCATION

Internatinal Islamic University Malaysia

Bachelor of Computer Science

GPA: 3.04 Dean's List for 1 Semester

Gombak, Kuala Lumpur

Feb. 2019 – Mar. 2024

EXPERIENCE

Back-end web developer Intern

Finterra

August 2023 – February 2024

Bukit Damansara, Kuala Lumpur

- Worked in developing the backend for mobile-app and admin panel using Nodejs/Expressjs and MongoDB using REST apis and AWS Cognito for user Authorization and Authentication
- Managed Git throughout development, ensuring code integrity, and efficient collaboration with the Front-end developer
- Engineered a dynamic and user-friendly form within the company's application using JavaScript and CSS

Trainer Assistant Intern

KidoCode

May 2023 – August 2023

Mont Kiara, Kuala Lumpur

- Assisted in teaching Python, HTML, JavaScript, Arduino and other Tools to kids and teenagers
- Gained experience in working with a team, and expanded my skills in Web development through some projects
- Worked on developing modules for the courses taken by students

PROJECTS

ProgHub | *React, Typescript, Expressjs, SQLite, Git*

Mar 2024

- Created a full-stack application built using Node/Express in typescript for backend
- Built Front-end React with Typescript and Chakra UI as component library
- Integrated SQLite for a simple, portable, and reliable option for storing data

MERN-AUTH | *React, NodeJS, Expressjs, MongoDB*

Nov 2023

- Created a full-stack application that uses JWT-based authentication using Express.js and React for front-end with redux for state management
- Integrated MongoDB for storing user data and managing authentication requests

Chess Game UI | *Python, PyGame*

Apr 2023

- Created a chess game UI that follows chess rules
- Implemented UI through the use of Python and the pygame library
